- o Collaborated across teams to transform ideas into functional applications.
- o Strengthened the company's digital presence and engagement through strategic initiatives.
- o Demonstrated proficiency in crafting dynamic WordPress websites.
- o Developed customized WordPress plugins to enhance platform capabilities.
- o Played a pivotal role in optimizing user experiences and functionality.

Key Projects

Project: DexMail - *Email Marketing Application*

Duration: 3 Months | Deployed single-handedly

Description:
Developed a robust and feature-rich email marketing application, DexMail, from concept to completion within a three-month period. Leveraged my expertise in PHP, Laravel, JavaScript, HTML, and CSS to create a comprehensive platform that empowers users with advanced email marketing capabilities.

Skills Utilized:
PHP, Laravel, JavaScript, HTML, CSS, Project Management, API Integration, Frontend Development, Backend Development, Email Marketing Best Practices, Quality Assurance, Independent Problem Solving.

Key Achievements:
- ✓ Independently designed, developed, and deployed DexMail, showcasing end-to-end project management prowess
- ✓ Utilized PHP, Laravel for secure backend, user auth, contact, and campaign tracking functionalities.
- ✓ Used JavaScript and dynamic tech for intuitive UI, elevating UX with real-time interactions.
- ✓ Built email template builder with HTML/CSS, integrated APIs for predictive marketing, enhancing targeting and engagement.

Project: Helpdesk - *Multi-User & Multi Account Email Client*

Duration: 5 Months | Deployed single-handedly

Description: This project involves an email client employing Gmail API and SMTP server functionalities. It facilitates management of numerous Gmail accounts, users with diverse permissions, and actions like replying and forwarding. The client boasts integrated chat capabilities and comprehensive admin-assigned filtering and restrictions.

Skills Utilized:
PHP (Laravel), JavaScript, MySQL, Google Web Services, API Integration, Frontend Development, Backend Development, Project Management.

Key Achievements:

- ✓ Successfully developed a multi-user Gmail client with Multi Account.
- ✓ Seamlessly integrated Gmail API and SMTP server capabilities.
- ✓ Implemented an intuitive integrated chat system for efficient communication.
- ✓ Created and fine-tuned admin-assigned filtering and user permission features.

Project: ERP - *Comprehensive Business Management Application*

Duration: 3 years | Deployed single-handedly

Description : Over an 3 Years period, I led the end-to-end development of a robust Enterprise Resource Planning (ERP) application. Leveraging PHP, MySQL, JavaScript, HTML, CSS, and PHPMailer, I meticulously crafted a multifaceted system that seamlessly integrates modules for Accounts, HR, Sales, Order Management, Lead Tracking, and Banking, including features like Letter of Credit (LC) management. The application empowers businesses with comprehensive tools for efficient daily operations and monitoring, enhancing productivity and decision-making. Till now I maintaining it.

Skills Utilized:
PHP, MySQL, JavaScript, HTML, CSS, PHPMailer, ERP Development, Module Integration, Full-stack Development, Project Management.
